

Being an associate member of the [TWAIN Working Group](#), the vendor has closer relationship with the TWAIN protocol maintainers and easier access to the latest trend and development. And, the vendor can make contributions to the TWAIN specification by proposing and vote for changes.

Technical Support

Rule #10: The web scanning component vendor must provide great technical support.

TWAIN can require special expertise and experience. Without prompt and accurate support from your vendor, you won't be able to get the most out of your TWAIN component. Poor technical support can result in hours spent struggling with technical issues, or even unsatisfied customers.

❏ Our Solution – Dynamic Web TWAIN

Dynamic Web TWAIN is a TWAIN control that enables you to acquire images from any TWAIN-compatible device. It includes a variety of features specifically designed for the web environment. It's been developed with four core objectives in mind:

1. User Experience - To provide applied function and powerful interaction for users
2. Security - To offer a safe component over the web
3. Compatibility - To support different browsers, web servers and protocols
4. Development – To save the time and energy for developers

Dynamic Web TWAIN is also backed by unrivalled industry technical support.

User Experience – Powerful Interaction for Users

- **Reduced web page load time**

The Dynamic Web TWAIN distribution file is only 213 KB for 32-bit IE and 301 KB for 64 bit IE, while the XPI file for Firefox, Chrome and other browsers is 201 KB. The .pkg file for Mac users is 416 KB. It takes seconds to download and install to the users' web browser.

- **Reduced image upload time**
